

## A VIRUS RIDDLE

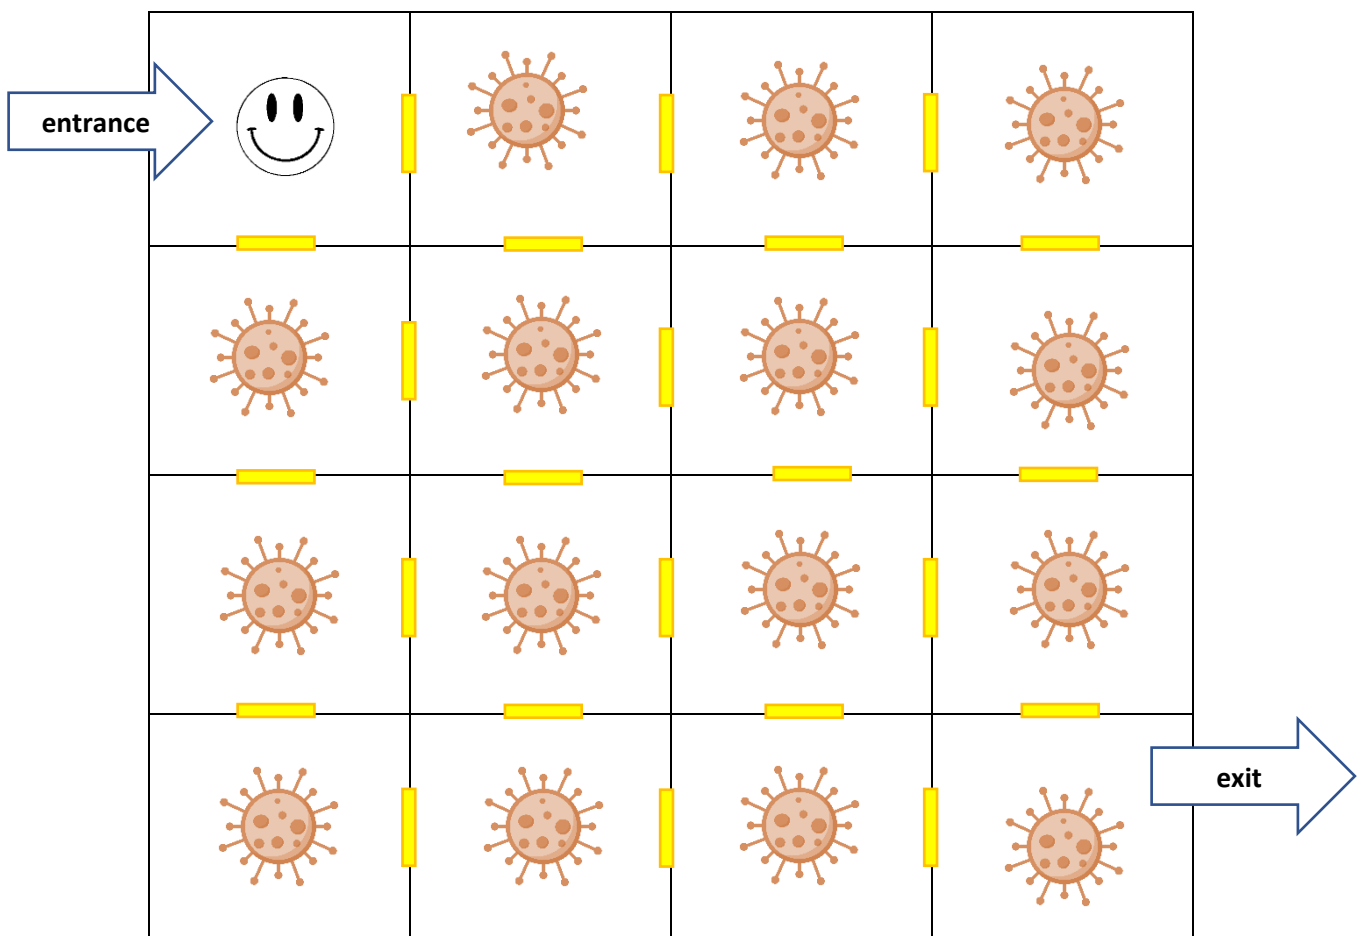

You are a scientist. You work in a building, it has 16 rooms: one entrance room, one exit room and 14 labs. On one evening, there is alarm because a dangerous virus got into all the labs and the exit room! There is a risk that it will come out into the air and will kill many people. You must save the world!

In every room there is a special switch. When you pull the switch, the whole room will be filled with concrete after you leave it (*poté, co ji opustíte*). It will decontaminate the room forever. You must decontaminate ALL the rooms. You must keep in mind these rules:

## RULES

1. YOU **MUST** ENTER THE BUILDING **THROUGH** THE ENTRANCE AND **LEAVE** THOROUGH THE EXIT.
2. EVERY ROOM **EXCEPT** THE ENTRANCE IS CONTAMINATED.
3. WHEN YOU ENTER A CONTAMINATED ROOM, YOU **MUST** PULL THE SWITCH.
4. AFTER PULLING THE SWITCH, YOU **MUST IMMEDIATELY** LEAVE THE ROOM.
5. YOU **CANNOT RETURN** TO A ROOM AFTER ITS SWITCH HAS BEEN PULLED.

 = dveře

**JAKOU CESTU BUDOVOU ZVOLÍTE, ABYSTE ZACHOVALI VŠECHNA PRAVIDLA A PŘITOM DEKONTAMINOVALI VŠECHNY MÍSTNOSTI?**

come out into the air = dostat se do vzduchu

special switch = speciální páčka/spínač

will be filled = bude naplněn

decontaminate = dekontaminovat, zbavit viru

keep in mind = mít na paměti

through the entrance = přes vstupní místnost

except = kromě

you cannot return = nesmíte se vrátit

after its switch has been pulled = poté, co byl sepnut spínač v dané místnosti
